

BRILLION Publishing

A TEXTBOOK ON PHARMACEUTICAL ANALYSIS THEORY & PRACTICALS

This comprehensive textbook is designed for first-semester B. Pharm students as per the latest PCI syllabus (BP102T & 108P). It bridges theory and practical application in pharmaceutical analysis, covering everything from limit tests and titrimetry to complexometric and redox titrations. With a clear, student-friendly approach, it transforms a complex subject into an accessible learning experience, ensuring exam success and strong foundational knowledge.

Features

- **Exam-Focused Content:** Specifically designed to help students excel in examinations, this book includes **100+ long theory questions** and an extensive bank of **over 2,000 Multiple Choice Questions (MCQs)**, providing rigorous practice and thorough preparation.
- **Complete PCI Syllabus Coverage:** Meticulously follows the Pharmacy Council of India (PCI) 2025 syllabus for B. Pharm 1st Semester. It covers all five theory units (including Acid-Base Chemistry, Non-aqueous Titrations, and Gastrointestinal Agents) and the complete BP108P practical regimen (including Limit Tests, standardization, and assays).
- **Integrated Theory & Practical Approach:** Each analytical concept (e.g., complexometry, precipitation titrations) is immediately reinforced with corresponding practical applications, such as the assay of Calcium gluconate or Sodium chloride. This unique structure helps students master both the *why* and the *how* of pharmaceutical analysis.

Bhaskar Kumar Gupta | Ashish Kumar

(Contents)

- Pharmaceutical analysis- Definition and scope
- Acid base titration: Theories of acid base indicators, classification of acid base titrations and theory involved in titrations of strong, weak, and very weak acids and bases, neutralization curves
- Non aqueous titration: Solvents, acidimetry and alkalimetry titration and estimation of Sodium benzoate and Ephedrine Hcl
- Precipitation titrations: Mohr's method, Volhard's, Modified Volhard's, Fajans method, estimation of sodium chloride
- Redox titrations
- Electrochemical methods of analysis
