Baby Corn Farming for Higher Income

Baby corn has emerged as a new potential source of vegetable. Its nutritional quality is at par or even superior to some of the seasonal vegetables. It is also a potential crop for earning foreign exchange, crop diversification and employment generation amongst the rural population. Despite its endless uses, there is hardly any book farming of baby corn. The prime objective of writing this book is to fill up this gap and provide comprehensive information in one compact volume.

Features:

- This book contains 12 chapters which cover information on all important aspects of baby corn.
- The Glossary of important terms used related to Baby Corn have been provided at the end for ready reference.
- Field and Laboratory photographs and list of Baby corn dealers has been appended. Important References have been listed at the end which would be useful in getting further details.

Contents:

1. Introductory Chapter Introduction Reproduction and Pollination Fertilization Growth and Development Forms of Corn Types of Baby Corn Grades of Baby Corn Defects Distribution Summary Questions	Ear characters Breeding Centers Summary Questions	Classification Tolerance Limits for Quality and Size Packaging Transportation Processing Storage Labeling Packaging Summary Questions	10. Breeding Approaches Introduction Breeding Objectives Breeding Approaches Role of Genetic Resources Future Thrusts Summary Questions
2. Benefits or Advantages Introduction Uses of Baby Corn Advantages of Baby Corn Health Benefits of Bab Corn Antioxidants Digestive benefits Summary Questions	5. Export and Import Potential Introduction Major Exporters Major Importers Expert Problems Summary Questions	8. Hybrid Seed Production Introduction Types of Hybrids Development of New Hybrids Stages of Hybrid Seed Production Factors Affecting Hybrid Seed Production Important Consideration for Hybrid Seed Production Top Cross Hybrids Disadvantages of Hybrids Summary Questions	11. Economics and Marketing Introduction Economics of Cultivation Marketing Marketing Channels Marketing Constraints Economics of Baby Corn Cultivation Summary Questions
3. Nutritional Quality and Value Added Products Introduction Quality and Nutritional Traits Nutritional Contents Value added Products Summary Questions	6. Cultivation Practices Introduction Soil and Climatic Requirements Land Preparation Varieties for Baby Corn Methods of Sowing Seed Rate Irrigation management Nutrient Management Weed Management Harvesting Intercropping Yield Summary Questions	9. Origin and Quantitative Genetic Analysis Introduction Geographical origin Genetic origin Variability Heritability and Genetic Advance Correlations Path Coefficient Analysis Summary Questions	12. Transfer of Technology and Success Story Introduction Mechanisms of Transfer of Technology Seed Production and Distribution Success Story of Baby CornHybrid HM 4 Success Story of Baby Corn in Thailand Summary Questions
4. Suitable Cultivars for Baby Corn Farming Introduction Criteria for Selection: Agronomic criteria	7. Post-Harvest Technology Introduction Harvesting Minimum Quality Requirements Grading		Appendix 1: Field and Laboratory Photographs of Baby Corn Appendix 2: List of Indian Companies dealing with Baby Corn Glossary References
