FRUIT SCIENCE

A Comprehensive Approach for ARS NET Pomology (Preliminary)

ICAR's Exams,
JRF, SRF, IARI (Ph.D),
SAU's and other
horticultural and
agricultural
entrance exams

This book on Fruit Science is meticulously crafted to align with the current educational landscape, tailored specifically to meet the requirements of B.Sc., M.Sc., and Ph.D. students specializing in Horticulture (Fruit Science). We're excited to share the first edition with you because there aren't many books out there that cover all the topics needed for the Agriculture Scientist Recruitment Board National Eligibility Test (ASRB NET) in Fruit Science.

Features

- This book provides valuable guidance for individuals preparing for a range of examinations, including ARS/NET Preliminary, ICAR's Exams, JRF, SRF, IARI (Ph.D), SAU's, and more. It's particularly beneficial for students aiming to secure admission in M. Sc. (Horticulture) and Ph. D. programs in Pomology through entrance exams at different institutions/universities.
- The book has been written in simple and applied language including topics: General Pomology, Canopy Management in Fruit Crops, Growth and Development, Biodiversity and Conservation, Biotechnology of Fruit Crops, Breeding of Fruit Crops, Post Harvest Technology, Protected Fruit Culture, Temperate Fruits, Tropical Fruits, Sub-Tropical Fruits and Plantation Crops.
- The book is beneficial for students, researchers and professionals who engaged in the field of fruit science. It seamlessly integrates the latest advancements in accordance with the 5th Deans Committee Recommendations.
