MCQ on ANIMAL GENETICS AND BREEDING

Animal Genetics and Breeding is an essential subject in the B.V.Sc. & A.H. curriculum and students often find it challenging due to its multi-disciplinary nature. This subject encompasses diverse areas such as biostatistics, cytogenetics, molecular genetics, population genetics, selection and breeding systems.

This book, *“MCQ on Animal Genetics and Breeding”*, is carefully designed to provide a comprehensive collection of multiple-choice questions aligned with the B.V.Sc. & A.H. syllabus. The book is sub-divided into topics covering biostatistics and computer applications, classical and molecular genetics, population and quantitative genetics, and animal breeding.

The questions are thoughtfully framed to enhance conceptual clarity, analytical ability, and application skills. Useful for undergraduate students, competitive exam aspirants, teachers, and researchers, this book serves as a handy guide to strengthen fundamentals and build confidence in Animal Genetics and Breeding.
