

QUESTION BANK ON DAIRY TECHNOLOGY

*(For ICAR JRF/SRF, ICAR-NET, ARS and
other Competition Examination)*

Question Book on Dairy Technology is a focused academic resource designed to strengthen conceptual clarity and exam readiness in dairy science. It systematically covers core topics through well-structured questions, supporting effective practice and rapid revision for major ICAR, National and state-level competitive examinations.

Features of the Book

1. Exam-Oriented and Comprehensive Coverage

The book is carefully aligned with the syllabi of ICAR JRF/SRF, NET, ARS, and various state and National competitive examinations. It comprehensively covers key areas of dairy technology. Questions are framed to reflect actual examination patterns, helping aspirants familiarize themselves with the level of difficulty, scope, and depth required to succeed in competitive exams.

2. Effective Practice and Revision Tool

Designed as a complete practice and revision companion, the book presents a wide range of objective based on conceptual questions that reinforce learning through repetition and self-assessment. It enables students to quickly revise important topics, identify weak areas, and improve accuracy and speed. The question-based format supports active learning, making it ideal for last-minute revision as well as long-term exam preparation.

3. Student-Friendly and Time-Saving Approach

The structured and concise presentation allows learners to grasp complex concepts efficiently. By consolidating essential information into a question-based format, the book saves time while maximizing retention. It is equally useful for undergraduate, postgraduate, and research aspirants seeking systematic preparation, confidence building, and consistent performance improvement in dairy technology examinations.
